

ROCKY BASIN
INCIDENT BUSINESS COMMITTEE

To: Rocky Mountain / Great Basin Fire Organizations
From: RMGB Incident Business Committee
Subject: Status of Competitive Agreements for 2010
Date: February 19, 2010

We would like to take this opportunity to update the fire community regarding status of competitive agreements.

National Equipment Solicitation Plan: A plan has been established that identifies which equipment type shall be solicited pre-season and when this will occur. In 2010 engines, tactical tenders, support tenders, buses and refrigerated trailers are being solicited. Equipment not regularly ordered in the Rocky Basin will not be solicited (e.g. mobile laundry units).
http://www.fs.fed.us/business/incident/static/eera/Competitive_Solicitation_Plan_Rev102809.pdf

Standard Equipment Specifications: An interagency group tasked by the Fire Equipment Working Team developed the specifications for tactical and logistical equipment utilized in the solicitation. This provides for cost effectiveness, consistency and efficiency nationally.

Solicitations: The Rocky Mountain/Great Basin Incident Business Committee coordinates with agency contracting officers to determine which agency will be responsible for each solicitation. A listing of the responsible Contracting Officer's for each type of equipment is attached. Please refer questions to the appropriate Contracting Officer.

Vendors will be able to choose a home dispatch center for each piece of equipment. Once agreements are awarded, Contracting Officers will generate Dispatch Priority Lists (DPLs).

The Contracting Officer will provide a "Dispatch Data Entry Report" to dispatch centers which provides the necessary information to enter vendor and equipment information into ROSS.

DPLs are linked to each GACC web site on the Equipment page and are utilized as outlined in the National Interagency Dispatch Standard Operating Guide for Contracted Resources:
http://www.nifc.gov/nicc/logistics/references/National_SOG_Contracted_Resources_Guide.pdf

- DPLs do NOT have to be utilized for initial attack, but must be used for extended attack.
- If a vendor cannot meet the date/time requested document this and go to the next vendor.
- If specific attributes are requested (i.e. CAFFS) contact the first vendor which can meet the requirement. Attributes are identified on the DPL.
- DPLs are only utilized for mobilization; demobilization is determined by the IC.
- Contracting Officers will notify the dispatch center if or when their DPL or agreement changes.
- Once the local unit DPL is exhausted, incident only EERAs can be initiated or the order can be placed through standard ordering procedures. Incident only EERAs cannot be reassigned. If a need is identified and the local DPL has been exhausted a new agreement can be initiated.

Agreements: When current agreements are modified for 2010 they will be available in PDF format from each GACCs website. <http://www.fs.fed.us/business/incident/vipragreements.php>

Evaluations: Evaluations are a requirement of the contract and shall be completed by each first line supervisor. These shall be turned into the Finance Section who will mail them to the appropriate Contracting Officer. If a finance section is not assigned to the incident, the incident agency will mail them directly to the appropriate Contracting Officer using the attached list.

Rocky Basin Contracting Officers for Solicited Equipment - 2010

Equipment	Contract Area	CO	Mail Performance Ratings to	CO Location	Contact Info
Support Water Tender	Great Basin	Sue Huston	324 25th Street Ogden, UT 84401	FS – R4	801-625-5811 shuston@fs.fed.us
Support Water Tender	Rocky Mountain	Joel Butzin	2250 Highway 50 Delta, CO 81416	FS – Colorado	970-874-6613 c-970-640-4375 jbutzin@fs.fed.us
